CONNECTIONS

The district will determine or approve all meter locations, and will furnish and maintain at its own cost all necessary fittings, pipes and appliances, including all meters and meter boxes, to deliver water to the consumer's pipeline, at a point near the property line. All such fittings, pipes, appliances, meters and meter boxes shall remain the property of the district and shall at all times be accessible to it, and under its control.

The line shall be of ample size, of standard weight and quality, and all cut-offs, valves, fixtures, and appliances furnished by the consumer shall be maintained in good order and condition. All such service lines shall be subject to inspection and approval by the district and the State Plumbing Inspector before the water supply will be turned on for use.

It shall not be permitted for any customer of the district to have piping within a house cross connected to any other source of water supply.

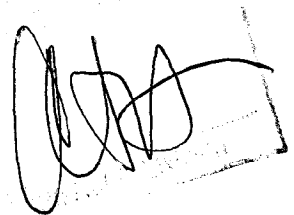

No connection into more than one building shall be made from any one tap unless the district has given its approval in writing.

SECTION X

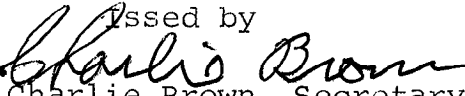

DAMAGES

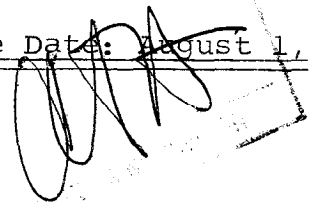

The district shall in no event be responsible for maintaining any service line owned by the consumer, nor for damages done by water escaping therefrom, nor for defects in lines, or fixtures, on the property of the consumer. The consumer shall at all times comply with all regulations of the district, relating to the service lines, and shall make all changes in his line required on account of change in grade, or otherwise.

RULES & REGULATIONS

SECTION XI

CONSUMERS

The word "consumer" as used in these rules and regulations shall be construed to mean each separate family, business, firm, corporation or individual taking water through a single service pipe for a single building or business for domestic, agriculture or business purposes; provided, however, that:

(a) The owner of a single building used as a multiple family dwelling or apartment house, and the owner of a mobile home park, occupied by one or more families, may connect such building, multiple family dwelling, apartment house or mobile home park, if not already connected, with the mains of the district, and be served by a single service line for which a minimum charge shall be paid according to the number of dwelling units, apartments, or mobile homes, in which case the application for service shall be made by the owner or his duly authorized agent and the bills for water shall be paid by the owner;

(b) Each separate store or place of business fronting twenty-five (25) feet or less on the street, if supplied with water connection or if using water from the district's mains, shall be considered a separate building, and shall pay a separate minimum;

(c) Where two or more families or places of business, or offices in a single building are supplied with water through a single service line each may be considered a separate building and shall pay a separate minimum.

Date of Issue: July 19, 1968

Effective Date August 1, 1968

Issued by

Charlie Brown, Secretary

Boone County Water District

RULES & REGULATIONS

(d) When the owner of the building either in person, or by his duly authorized agent fails or refuses to sign an application for service, or fails to pay the bills for water when due, or fails to abide by all the rules and regulations of the district, the service may be discontinued; but no such action involving the shutting off of the water supply of an innocent consumer shall be taken without first affording the tenant of the premises opportunity to make a new application for a supply of water through a separate service line or meter.

SECTION XII

STOP AND WASTE VALVE

A stop and waste cock or cut-off valve must be placed in the pipeline on the premises of the consumer, to be used in case of break or other necessity, whereby pipes to be repaired can be cut off without the necessity of using the street corporation or meter box cut-off.

SECTION XIII

METERS

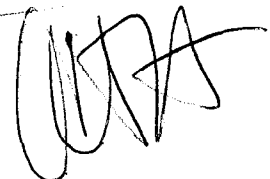

All meters shall be furnished by the district and shall remain its property and be accessible to and subject to its control. They shall be conveniently located at a point approved by the district, so as to control the entire supply, and when located on premises of consumer a proper place therefor shall be provided by consumer.

Date of Issue: July 19, 1968

Effective Date: August 1, 1968

Issued by

Charlie Brown, Secretary

Boone County Water District

RULES & REGULATIONS

(a) Where water is furnished by a flat rate, the district shall have the right to install, maintain and inspect a meter to determine the quantity supplied, and the consumer shall provide a suitable location therefor. The district shall have the right to continue the use of the meter, and furnish water by meter rate only, and the consumer shall thereafter pay the meter rate schedule. The district also reserves the right to change from flat rate service to metered service at any time.

(b) The district shall maintain all meters without charge to the consumer with the exception that if a meter should be destroyed or damaged through negligence of the consumer, the cost of replacement or repair shall be charged to the consumer. Failure to pay this charge will result in the discontinuance of the service. The consumer shall notify the district of any injury to or failure of the meter as soon as it comes to his knowledge.

(c) When water is furnished by meter, the quantity recorded by it shall be conclusive on both the consumer and the district, except when the meter has been found to be registering inaccurately or has ceased to register. In the latter case the quantity may be determined by the average registration of the meter when in order.

(d) Meters will be removed and tested for accuracy when requested by any consumer providing that the consumer, or a representative of the consumer, accompany said meter to the office to witness the test. However, the cost of such testing shall be paid by the consumer in the event that the accuracy of the meter is within two per cent of a true and correct reading. In the event the meter so tested is found to have an error in registration of two per cent, or more, the cost of testing shall be borne by the district and a new or reconditioned tested meter will be installed at no cost to the consumer, and the bills will be increased or decreased accordingly, not to exceed the previous twelve months.

RULES AND REGULATIONS

MONITORING OF CUSTOMER USAGE

AT LEAST ONCE ANNUALLY THE DISTRICT WILL MONITOR THE USAGE OF EACH CUSTOMER ACCORDING TO THE FOLLOWING SCHEDULE.

1. THE CUSTOMER'S ANNUAL USAGE FOR THE MOST RECENT 12 MONTH PERIOD WILL BE COMPARED WITH THE ANNUAL USAGE FOR THE 12 MONTHS IMMEDIATELY PRECEDING THAT PERIOD.
2. IF THE ANNUAL USAGE FOR THE TWO PERIODS ARE SUBSTANTIALLY THE SAME OR IF ANY DIFFERENCE IS KNOWN TO BE ATTRIBUTED TO UNIQUE CIRCUMSTANCES, SUCH AS UNUSUAL WEATHER CONDITIONS, COMMON TO ALL CUSTOMERS, NO FURTHER REVIEW WILL BE DONE.
3. IF THE ANNUAL USAGES DIFFER BY THREE TIMES OR MORE OF THE AVERAGE USAGE AND CANNOT BE ATTRIBUTED TO A COMMON CAUSE, THE DISTRICT WILL COMPARE THE CUSTOMER'S MONTHLY USAGE RECORDS FOR THE 12 MONTH PERIOD WITH THE MONTHLY USAGE FOR THE SAME MONTHS OF THE PRECEDING YEAR.
4. IF THE CAUSE FOR THE USAGE DEVIATION CANNOT BE DETERMINED FROM ANALYSIS OF CUSTOMER'S METER READING AND BILLING RECORDS, THE DISTRICT WILL CONTACT THE CUSTOMER TO DETERMINE WHETHER THERE HAVE BEEN CHANGES SUCH AS DIFFERENT NUMBER OF HOUSEHOLD MEMBERS OR WORK STAFF, ADDITIONAL OR DIFFERENT APPLIANCES, CHANGES IN BUSINESS VOLUME, OR KNOWN LEAKS IN THE CUSTOMERS SERVICE LINE.
5. WHERE THE DEVIATION IS NOT OTHERWISE EXPLAINED, THE DISTRICT WILL TEST THE CUSTOMERS METER TO DETERMINE WHETHER IT SHOWS AN AVERAGE ERROR GREATER THAN 2 PERCENT FAST OR SLOW.
6. THE DISTRICT WILL NOTIFY THE CUSTOMER OF THE INVESTIGATION, ITS FINDINGS, AND ANY REFUNDS OR BACKBILLING IN ACCORDANCE WITH 807 KAR 5:006, SECTION 10 (4) AND (5).

IN ADDITION TO THE ANNUAL MONITORING, THE DISTRICT WILL IMMEDIATELY INVESTIGATE USAGE DEVIATIONS BROUGHT TO IT BY THE PUBLIC SERVICE COMMISSION OF KENTUCKY AS A RESULT OF ITS ON-GOING METER READING AND BILLING PROCESSING OF CUSTOMER INQUIRY.

WATER EMERGENCY SUPPLY PLAN

It is the purpose of the Water Emergency Supply Plan to outline the measures that will be taken to meet the water needs of Boone County. The critical variables that will determine which phase of the plan will be enforced are available supply of water, daily customer demand, and anticipated precipitation that would greatly reduce the amount of outdoor water use in the service area.

Since this Plan relies on customer conservation to ensure an adequate supply of drinking water to all customers, the most important component of the Plan will be keeping the customers informed at all times. Their awareness and understanding of the situation from the initial stages of concern and continuing through each phase of plan is the key to an efficient and adequate response to a water shortage problem.

BOONE COUNTY WATER DISTRICT INTERNAL CONSERVATION EFFORTS

Once the District declares the first level of alert in the Water Supply Emergency Plan, the Office Manager of the Boone County Water District will direct the following internal conservation measures:

1. Suspend the Flushing Program and all non-essential flushing. All personnel will be directed to keep flushing to a bare minimum.
2. Leak detection will become the highest priority of the Repair and Flushing Crew until the shortage is declared over.
3. Increase customer education programs to reach as many customers as possible in the affected service areas.
4. Suspend the flushing of new lines unless the new line will contribute towards alleviating the problem.
5. Suspend the issuing of hydrant permits.
6. Initiate communications with all fire departments within the affected areas to suspend all wet drills and to limit use to the bare minimum needed to provide adequate fire protection.

BOONE COUNTY WATER DISTRICT LEVELS OF CONSERVATION

It is understood that the Level 1 Program is the least restrictive and the Level 4 Program is the most restrictive program.
